Welcome to ReviewIQ

The Centralized, AI-Powered Review Management System

GOOGLE PLACES SYNC · AI INSIGHTS · SECURE AUTH

Fragmented Feedback & Lost Insights.

Organizations receive feedback from internal forms, staff, and platforms like Google or Zomato. These are scattered across systems with no centralized visibility, making sentiment monitoring and timely responses impossible.

- ❌ **No Centralization:** Reviews distributed across internal systems and 3rd party platforms.

- ❌ **Unstructured Collection:** Lack of direct review collection mechanisms post-service.

- ❌ **Categorization Struggles:** Difficulty filtering by food, service, staff, or ambience.

- ❌ **Delayed Action:** Inconsistent responses impacting brand reputation and retention.

- ❌ **Blind Spots:** No structured branch-wise or staff-wise performance insights.

Unify, Analyze, and Automate

Enterprise Analytics Overview

An elegant, dark-themed command center built with Tailwind CSS and Chart.js mapping real-time data.

✓ Live Sentiment Trend Charts

✓ Performance Ranking by Branch

✓ Urgent Issue Escalation Alerts

Alen Thomas
★★★★★

| "Absolutely incredible service. The staff was super friendly and the UI of this portal is stunningly beautiful."
